

DORNEY LAKE

Team Building - Gigs and Bell Boats

At Dorney Lake, we understand that when a team has fun, it becomes more effective and relationships grow stronger. The main objective of this activity is to have fun and also to encourage team work and observation skills.

Originating in the South West of England, Bell Boats are stable, twin hulled canoes arranged like a catamaran with a walkway between the hulls. The crews paddle with canoe style single paddles.

Our replica 1829 Oxford & Cambridge Gigs are unique to Dorney Lake. These boats are very stable rowing boats and are ideal for novices.

Teams will be given a safety briefing on land prior to going out onto the water. Coaching will be given by our experienced event team and the event will culminate in a fun regatta race with medals awarded to the winning team.
